**WORK TO RESUME ON CONCORD - PEMBROKE I-393 PROJECT**

The New Hampshire Department of Transportation announces work is expected to resume on March 25 on 3.3 miles of Interstate 393 in Concord and Pembroke.

This project, which began in June 2001, involves bridge and pavement rehabilitation, and sign and guardrail replacement. Much of the remaining work will focus on sign and guardrail work and final paving.

Motorists should expect occasional lane closures, both eastbound and westbound, in order for the work to be accomplished. In recognition of commuting hours, any westbound lane closures will not be in effect until after 9:00 am, and there will be no eastbound lane closures after 3:00 pm.

Pike Industries, of Belmont, New Hampshire, is the general contractor for the \$5.4 million project, which is scheduled to be completed in June 2002.
